

-----User Manual-----

At the **start**, choose Single player to play hangman with a random word, or Multiplayer to choose a word yourself.

If **single player** is selected, press the yellow Start Game button to continue to the hangman game.

If **multiplayer** is selected, either type your own six-letter word then press enter, or pick from one of the 18 options provided on buttons.

Click the **X** in top right corner to go back to the start choice.

Once you have started the **hangman game**, in single player or multiplayer, type a single letter in the white box.

After you have pressed enter with one letter, your guess should appear in between the two brackets [] below.

When you are ready to confirm your letter guess, press the pink **YES** button in the bottom right corner.

The game is lost if you have guessed 7 letters incorrectly, and the stick man head fills with pink.

The game is won if you correctly guessed the word.

After either of these **end** results, press the **X** in top right corner to head back to the previous window (Single player or Multiplayer).

You can start a new game from there, or go back to the start choice.
